

**Amendments to the Claims:** This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A sprayable composition, the sprayable composition comprising:  
a cosmetic agent or mixture of cosmetic agents selected from the group consisting of sunscreen agents, self-tanning agents, depilatories, exfoliating agents, and mixtures thereof;  
an emulsifier or mixture of emulsifiers;  
a rheology control agent; and  
55-80 wt% water based on the total weight of the sprayable composition;  
in which:  
the cosmetic agent or mixture of cosmetic agents comprises about 0.1 wt% to 40 wt% of the composition;  
the emulsifier or mixture of emulsifiers comprises about 0.2 wt% to about 20 wt% of the composition;  
the rheology control agent comprises about 0.2 wt% to about ~~5~~ 3 wt% of the composition;  
the rheology control agent comprises coprocessed microcrystalline cellulose and ~~at least one of~~ carboxymethylcellulose, sodium salts of carboxymethylcellulose, xanthan gum, carrageenans, alginates, hydroxypropylmethyl cellulose, hydroxypropyl cellulose, hydroxyethyl cellulose, acrylic acid, starch, surfactants, attriting agents and bulking agents, wherein said coprocessed microcrystalline cellulose has an average particle size of 50 microns or less;  
the composition has a viscosity at high shear of 120 Pa-s or less; and  
wherein said composition is sprayable in a non-aerosol spray device.
2. (Previously Presented) The composition of claim 1 in which the composition has a

viscosity at high shear of 100 Pa-s or less.

3. (Original) The composition of claim 1 or claim 2 in which the cosmetic agent or mixture of cosmetic agents comprises about 2 wt% to about 20 wt% of cosmetic agents selected from the group consisting of emollients, occlusive agents, moisturizers, and humectants.

4. Cancelled

5. (Currently Amended) The composition ~~of any preceding claim~~ as in any one of claims 1-2 in which the coprocessed microcrystalline cellulose has an average particle size of below 10 microns.

6. (Previously Presented) The composition as in any one of claims 1-2 in which the microcrystalline cellulose is a water-dispersible microcrystalline cellulose.

7. Cancelled.

8. (Previously Presented) The composition of claim 1 in which the coprocessed microcrystalline cellulose comprises the microcrystalline cellulose and sodium salt of carboxymethylcellulose in a ratio of about 85/15, by weight.

9. (Currently Amended) The composition as in any one of claims 1-2 or 8 in which the coprocessed microcrystalline cellulose has an average particle size of below 1 micron.

10. (Previously Presented) The composition as in any one of claims 1-2 or 8 in which the cosmetic agent comprises a sunscreen agent or a mixture of sunscreen agents.

11. (Original) The composition of claim 10 in which the sunscreen agent or mixture of

sunscreen agents comprises an inorganic sunscreen agent or a mixture of inorganic sunscreen agents.

12. (Previously Presented) The composition as in any one of claims 1-2 or 8 in which the sunscreen agent or mixture of sunscreen agents comprises an organic sunscreen agent or a mixture of organic sunscreen agents.

13. (Previously Presented) The composition of claim 10 in which the composition has a sun protection factor of at least 12.

14. (Previously Presented) The composition of any one of claims 1 to 2 or 8 in which the composition comprises a self-tanning agent.

15. (Previously Presented) The composition as in any one of claims 1-2 or 8 in which the composition has a viscosity at a high shear of 80 Pa-s or less.

16. (Previously Presented) The composition as in any one of claims 1-2 or 8 in which the composition has a rundown time of 100 seconds or greater.

17. Cancelled.

18. (Currently Amended) A method for applying a cosmetic composition, the method comprising the step of spraying the cosmetic composition ~~of any of the preceding claims~~ in any one of claims 1-2 or 8 onto the skin, onto the hair, or onto the skin and the hair.
